

GEORETAIN CAPABILITY STATEMENT

GeoRetain Pty Ltd is a specialist drilling and ground engineering subcontractor newly created to capture the Queensland and Northern NSW market. Driven by an energetic and youthful management group with proven industry expertise, GeoRetain's goal is to establish itself as the preeminent ground engineering subcontractor in an evolving and competitive market.

Complimented by a suite of plant and equipment resources unrivalled within the industry, GeoRetain offers a diverse range of ground retention and foundation solutions for various clients throughout the region, including government authorities, main contractors, subcontractors, developers and proprietors.

Led by a strong and experienced senior management team with over 20 years of ground engineering expertise, GeoRetain strives to provide the most cost effective, value added and on-time drilling and retention solutions for civil infrastructure, commercial and residential projects.

The GeoRetain senior management group have been directly involved with the management of subcontract works for some of the most prominent projects undertaken in Queensland over the past 10 years including the Clem 7 Tunnel (complete retention package for the southern portal); the Gateway Bridge Upgrade (entire retention package); the Gateway Motorway Upgrade; Cardwell Range (acceleration of works); the Airport Link (significant share of the project's retention packages) and the Ipswich Motorway Update (complete retention package over a 2.5 year project duration).

GeoRetain prides itself on its workmanship; the standard of its plant and equipment; its knowledgeable and resourceful work force; and its commitment to work closely with clients and contractors to provide cost effective and quality outcomes.

CAPABILITIES & SERVICES OFFERED

GeoRetain offers the following services:

- **Rock Anchors:** Permanent and temporary strand anchors
- **Soil Nails & Rock Dowels:** Permanent and temporary bar anchors
